

Sequence alignment of various TGF β R isoforms (TGFbR) from different species. The alignment shows the amino acid sequence for each isoform, with positions 1-200, 210-400, 410-600, 610-800, 810-900, and 1010-1190 indicated along the top. Colored bars above the sequences indicate conserved regions across the family.

Conservation scale (top to bottom):

- Black: Very Conserved
- Dark Gray: Conserved
- Light Gray: Semi-conserved
- White: Variable
